**Subject:** Our new paper on PFASs "A Never-Ending Story of Per- and Polyfluoroalkyl Substances (PFASs)?"  
**Attachments:** ZW\_2017\_PFAS.pdf

Dear Toni,

In the attachment you can find our most recent Feature article on PFASs at ES&T. In this paper, we express our concern that over 3000 PFASs have been on the global market, yet most research and regulation continues to focus on PFOS, PFOA and their major precursors. In particular, we systematically analyse why PFASs are an intractable chemicals management issue under the current paradigm, and call on the global community to urgently address the whole group of PFASs with some thoughts and recommendations from our side. We hope this would create some more awareness and momentum on PFAS-related issues internationally and then the actions addressing these compounds could be moved forward in the near future. This work is also sort of a starting point of the workshop that we plan to hold in November. Should you have any questions, comments, suggestions and recommendations, please do not hesitate to tell us. Thanks in advance! Have a good day!

Best regards,  
Zhanyun
